

3:1:Earth Day Expository Writing:

Step 1: Graphic Organizer:

Each child will trace their hand on white paper, and then draw/illustrate the seven continents within the hand area. Color the continents, to look like land forms and oceans. Cut out hand and glue at top of a piece of construction paper. Use the lined paper document to do your final expository writing on.

Student will make a rough expository draft highlighting the three things that you can help do to save the earth. After rough draft, is checked, rewrite on lined paper, and attached it to construction paper with the hand print, title it Earth Day.
