

## **Grab Bag Activity:**

- 1) Create bags filled with different colored items.
- 2) Students will pull items out one at a time and record using tally marks to indicate how many times each color is pulled out.
- 3) Based on the data collected, students will state the probability of each color being pulled as likely, unlikely, certain or impossible.

***\*Use Teacher Resource pgs 1 - 5 on the Probability Games attachment to go along with this activity.***
