

Matching Expressions

Often, verbal expressions can be written in more than one way. Cut out the following expressions and match them with an equivalent expression. Then glue them together on the sheet of construction paper given to you. Beside the pair, write the matching algebraic expression. Be sure everyone in your group contributes.

Five less than a number	The quotient of five and a number
The product of five and a number	Five minus a number divided by two
The square of a number plus five	A number split evenly into five groups
A number divided by five	Five times a number
Five decreased by half of a number	A number minus five
Five divided by a number	A number to the second power increased by five
