Directions –

Visit the suggested Internet sites or your local library to investigate your particular U.S. region. Collect music, audio, video clips, pictures and information to include in your presentation.

Each presentation must contain --

Circle, bar or chart graph that illustrates geographic, economic, cultural, natural or population aspects of your selected region. This chart or graph must have correct labels, a short description of the information and a documented source.

Maps of the region with labeled states, largest cities and landforms.

Pictures, video and audio clips that represent various aspects of the region. Each piece should include a short description and documented source.

Each aspect of the region should be covered including population, climate, landforms, economics, culture, famous people and places, and natural resources.

Make sure you have collected feedback from several sources to ensure a quality presentation.
